FEATURES

Chain and sprocket drive

SQUARE FLANGE, DROP-THRU VALVE

The RVS Series Standard Rotary Airlock Valve is ideal for the pneumatic conveying of dry, free flowing, non-cohesive bulk density products or powders. This square flange, drop-thru valve feeds material through the six rotating vanes where it drops out the bottom outlet flange via gravity. This outboard bearing airlock (valve) achieves high fill efficiencies with minimum air leakage, due to precise machining and tight rotor clearances. The RVS Series Standard Rotary Airlock Valve is available in a 12" size.

APPLICATIONS & USE

Typical Bulk **Materials Processed**

- Powder Soda Ash Activated Fly Ash
 - Carbon (PAC) Rice Plastic Lime
- Pellets Cement Magnesium **Peanuts** Oxide Others

Typical Applications

- Water Treatment
- Chemical Processing
- Mining
- Grain Handling
- General Industrial
- Oil and Gas
- Glass and Ceramics
- Pulp and Paper

Applicability can vary by system make and model. For an evaluation, contact us: salesinguiries@carmeuse.com

Square inlet and outlet flange More readily matches a square duct arrangement without the need for transitions assuring system compatibility Fabricated six vane, adjustable/ Maximizes pocket capacity causing less air leakage replaceable tip rotor Cast iron construction Offers rugged design providing maximum structural stability Precision-machined housing Minimizes rotor-to-barrel clearances limiting leakage Outboard bearing design Protects bearings from damaging contaminant extending maintenance cycles Packing gland type seals Makes for easy maintenance saving on costs Tapered throat valve inlet Ensures material flow to rotor pockets design maximizing performance Handles differential pressures Well suited for pneumatic conveying operations increasing productivity up to 15 psi Offers smaller footprint and greater

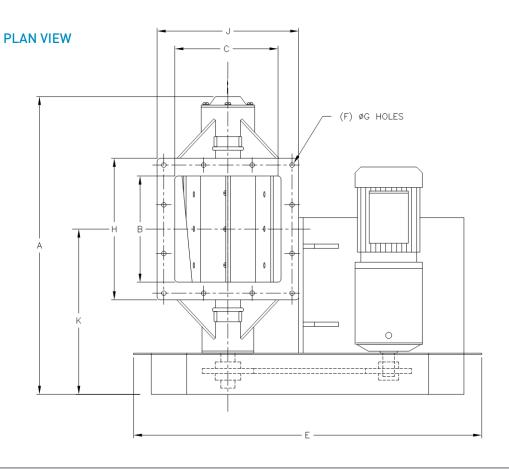

speed selection providing flexibility to the

applications being used

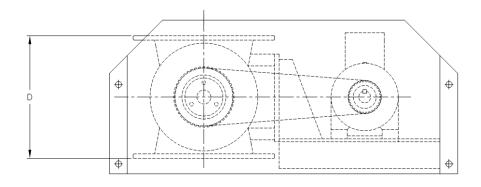

BENEFITS

RVS SERIES ROTARY AIRLOCK VALVE MODEL AVAILABILITY

MODEL	CAPACITY (ft³/rev [m³/rev]) @ 100% efficiency	A (in. [mm])	B (in. [mm])	C (in. [mm])	D (in. [mm])	E (in. [mm])
RVS-02	0.2 [0.0057]	27 [686]	9 [229]	9 [229]	10 ³ / ₈ [264]	29 ¹ / ₂ [750]

ELEVATION VIEW

NOTE:

Information / dimensions shown are for reference only and is subject to change based on final design and applications.

F	G	H	J	K	Weight	
-	(in. [mm])	(in. [mm])	(in. [mm])	(in. [mm])	(lbs. [kg])	
12	⁷ / ₁₆ [12]	12 [305]	12 [305]	15 ¹ / ₂ [394]	240 [109]	

SPECIFICATIONS

PROCESS REQUIREMENT

- Differential Pressure across valve: Max. 15 psig [103 kPag]
- (Optional) Air Supply for Purge Package: Max. flow of 10 CFM [17 m³/h] @ pressure of 2 psig [14 kPag] higher than operating pressure

ADD-ON FEATURES

- Gearbox with NEMA / IEC Motor
- Washdown / Chemical / Explosion-Proof Duty Motor
- Rotor:
 - High Temperature Application
 - Hardened Carbon Steel
 - Closed End
 - Filled Pocket
 - Adjustable / Replaceable Tips
- Seal Purge Package
- End Purge Package
- Shear Protector
- Motion Detector
- Convey Attachment

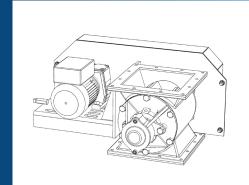

MATERIAL OF CONSTRUCTION

- Standard:
 - Housing: G4000 Cast Iron
 - Rotor: C1018 / C1020 Carbon Steel
 - Shear Protector: A36 Carbon Steel
 - Convey Attachment: A36 Carbon Steel
- Options:
 - Housing: Hard Chromed Liner / CF8
 Stainless Steel
 - Rotor: Hardened Carbon Steel / 304
 Stainless Steel / 316 Stainless Steel
 - Shear Protector: 304 Stainless Steel / 316 Stainless Steel
 - Convey Attachment: 304 Stainless Steel / 316 Stainless Steel
