

## Steel Dynamics, Inc. - Colombia City Announcement

Carmeuse Systems is proud to announce the installation of lime storage and bulk material handling systems for Steel Dynamics, Inc. at their Columbia City location in Whitley County, Indiana. The custom-engineered solution encompasses a lime storage silo, rotary valve, and a pneumatic conveying system tailored to the site's unique material handling needs.

Leveraging decades of expertise in bulk material storage and transfer, Carmeuse Systems designed a solution for efficiency and reliability. Our experienced technicians, engineers, and implementation teams collaborated closely with the SDI team to ensure ample capacity and smooth integration with their existing operations.

"I am really proud of the collaborative approach SDI and Carmeuse's teams took to bring this project from identifying a need through implementation of a practical solution" said Darren Farnworth, Senior Manager of Applications at Carmeuse Systems.

As a leading force in domestic steel production and metal recycling, SDI uses state-of-the-art electric arc furnace (EAF) technology to craft quality, lower-emission steel. At Carmeuse Systems, we're honored to contribute to this process by delivering trusted lime handling solutions.

### **About Carmeuse Systems**

*Carmeuse Systems is your trusted partner for designing, integrating, and upgrading lime handling systems. As part of the Carmeuse Group, our teams have unrivaled expertise in understanding the role of lime handling equipment within your operation. From selecting the appropriate raw material, to system engineering, enhancements, and maintenance, our teams provide End-2-End support and guidance. We make complex projects seem simple and help our customers every step of the way. For more information, visit [systems.carmeuse.com](https://systems.carmeuse.com).*

***About Steel Dynamics Inc.***

*Steel Dynamics is one of the largest domestic steel producers and metals recyclers in North America, based on estimated annual steelmaking and metals recycling capability, with facilities located throughout the United States, and in Mexico. Steel Dynamics produces steel products, including hot roll, cold roll, and coated sheet steel, structural steel beams and shapes, rail, engineered special-bar quality steel, cold finished steel, merchant bar products, specialty steel sections, and steel joists and deck. In addition, the company produces liquid pig iron and processes and sells ferrous and nonferrous scrap.*
